

among the claimed inventions involving one or more of the same corresponding special technical feature.

Furthermore, the international examiner found no lack of unity among the pending claims. Box IV of the written opinion of the international search authority was not checked. Thus, using the unity of invention standard, the international examiner found no lack of unity.

The special technical feature that defines a contribution over the prior art is the vaccinia virus composition embodiments. The paper filed February 16, 2011 alleging a lack of unity fails to set forth any X or Y references identified in the international search report or written opinion. Thus, Applicants believe that the claims do have unity of invention. Accordingly, withdrawal of the determination of lack of unity of invention is respectfully requested.

The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment, to Deposit Account No. 50-3212.

Respectfully submitted,

/Brendan O. Baggot, Reg. No. 56,313/
